“Regional Report Americas”
Peter Kneisel
TTC meeting New Delhi 2008

“Some Single Cell Test Results”
P. Kneisel, G. Ciovati

“Progress on Large Grain and Single Grain Niobium Ingots and Sheet and Review of Progress on Large Grain and Single Grain Niobium Cavities”
P. Kneisel
Proc. SRF2007, paper TH102

“Latest Developments in Superconducting RF Structures for Beta=1 Particle Acceleration”
P. Kneisel
Proc. EPAC 2006, paper WEXPA01

“Development of Large Grain/Single Crystal Niobium Cavity technology at Jefferson Lab”
P. Kneisel, G.R. Myneni, G. Ciovati, J. Sekutowicz and T. Carneiro
AIP Conference Proceedings 927, p. 84

“SRF Cavity Technology”
P. Kneisel
ILC School Sokendai, Japan, May 19-27, 2006

“R&D Activities for ILC”
P. Kneisel
AARD Marx panel meeting, FermiLab, February 15, 2006

“Cavity Preparation /Assembly Techniques and Impact on Q, realistic Q-factors in a module, review of modules”
P. Kneisel
ERL 2005

“Performance of Large Grain and Single Crystal Niobium Cavities”
P. Kneisel, G.R. Myneni, G. Ciovati, J. Sekutowicz, T. Carneiro,
Proc. SRF 2005, paper MoP09

“Materials and materials R&D”
P. Kneisel
Second ILC Workshop, Snowmass Aug. 13-27, 2005
“Update on Large Grain Niobium cavities”  
P.Kneisel, G. Ciovati and G.R.Myneni  
http://www.lnf.infn.it/conference/ilc05/programme.html; TTC Meeting Frascati Dec. 3 – 5, 2005

“Niobium Evaluation for Cost Reduction”  
P.Kneisel  
First ILC Workshop, KEK, Nov. 13-15, 2004

“Pushing the Limits Towards Achieving Ultimate Capabilities”  
P. Kneisel  
Pushing the Limits of RF Superconductivity Workshop

“Surface Characterization: what has been done, what has been learnt?“  
P. Kneisel  
Proc. SRF2003; paper TuO02

“Superconducting Radio Frequency Technology: An Overview”  
P. Kneisel  
Materiaux and Techniques No. 7-8, p. 1 ff, UHPM 2003

“State of the Art of Multicell SC Cavities and Perspectives”  
P. Kneisel  
Proc. EPAC 2002, p. 139

“Preliminary Experience with “In-situ” baking of Niobium Cavities”  
P. Kneisel  
Proc. 9th Workshop on RF Superconductivity, Santa Fe(1999), p. 328
