

ACCELERATOR SEMINAR

SRF Technology Progress Update – Report from TTC Meeting @ DESY

***M. Drury, A. Palczewski, C. Reece,
SRF Institute,
Jefferson Lab***

The Tesla Technology Collaboration is the international association that links SRF technology groups worldwide. The collaboration's latest meeting was held at DESY, March 24 – 27. The program focused on common issues and recent technical progress dealing with Nb material specifications, cavity surface treatments, commercial production issues and yields, rf coupler developments, and cryomodule design and assembly. We will provide summary highlights from the meeting that are relevant to current and potential JLab programs.
